

# CAST IRON WELDING

Cast iron welding and repairs are a speciality at Starweld. We serve a range of industry sectors, including, marine, automotive, architectural, heritage, industrial, and engineering. A variety of hot and cold techniques are used, which have been developed and refined over many years. The combination of up to date welding technology and pre-heating facilities means we can provide effective repairs to any damaged or cracked cast iron component.

## Cast iron components that can be repaired include:

- Cylinder heads
- Turbo casings
- Engine blocks
- Manifolds
- Pistons
- Press parts
- Lathe machinery
- Lampposts
- Statues
- Gates and railings
- Pulleys and gears
- Missed castings

All repairs are carried out to exacting standards, with our quality systems ISO9001: 2008 accredited.

Repairs can be followed by full machining and testing where specified.
